# **Virgin Mary Mosaic Made from 15,000 Easter Eggs**

Ukrainian artist Oksana Mas has created an unusual mosaic portrait of the Virgin Mary, using 15,000 painted Easter Eggs. Unveiled yesterday, inside the gorgeous Saint Sophia Cathedral in Kyiv, the giant mosaic weighs 2.5 tons and is made out of 15,000 wooden Easter Eggs.

Oksana Mas started working on her masterpiece nine months ago, painting the eggs all by herself, but later children from all across the country got involved and helped out with the painting. The Easter-egg portrait of the Virgin Mary, by Oksana Mas, measures 7x7 meters.
